Maplesoft Hosting Services

Whether you are using Maple T.A.™ or the Maple T.A. MAA Placement Test Suite for a class, a department, or across your entire campus, you can leave the logistics to us!

Maplesoft offers hosting services for Maple T.A. and the Maple T.A. MAA Placement Test Suite, which uses Maple T.A. We can look after all the details of setting up and maintaining a Maple T.A. server so you can get started immediately and never have to worry about your Maple T.A. or Maple T.A. MAA Placement Test Suite services.

Benefits:

• Your Maple T.A. server is set up by experts who will tune your Maple T.A. environment to suit your situation.

• Maplesoft staff will handle all server maintenance, including installing patches and major upgrades, at a time convenient to you.

• When desired, Maplesoft staff will assist in integrating Maple T.A. with your Blackboard®, Moodle™, or Brightspace™ course management system. (Blackboard and Brightspace connectors sold separately.) Custom integration help is available for other course management and data management systems, for an additional fee.

• Maple T.A. experts are available to answer all your product support questions.

• Maple T.A. is run on high-performance, high-capacity servers that are scalable to your needs.

• Daily data backups are sent off-site to a secure server.

• All servers run on an Uninterruptable Power Supply (UPS), with a back-up diesel generator to provide power in case of a long outage.

• Services are monitored continuously, with automatic alerts in case of failure.

• Data-center staff are carefully trained so they can respond quickly to alerts at any time – 24/7.

Average historical up-time is over 99.9% for all our Maple T.A. hosted customers!
