# Waterloo Maple Announces Japanese Edition of Maple 7

**WATERLOO, CANADA, January 29, 2002**—Waterloo Maple, a world leader in mathematical software for education, research and industry, announces the release of Maple 7, Japanese Edition, to begin shipping as of March 4th, 2002 through Cybernet Systems Co. Ltd., of Japan.

Maple 7 Japanese Edition offers a Japanese interface while possessing all of the same powerful features and programming capabilities for which Maple is famous. The Maple 7 Japanese Edition features a Japanese Graphical User Interface (GUI), including menus and dialogs, and online help and search capabilities. As in Maple 7, this edition includes a sweeping range of mathematical algorithms in key areas, such as differential equations and numerical computation, and enhanced Web connectivity, including comprehensive MathML 2.0 support, XML support and TCP/IP sockets-based access to online information.

In a recent review, IEEE Spectrum Magazine described Maple as "a high-end math package that is used in virtually every major university and research center in the world...," and that Maple "combines extensive symbolic math, numerical, and graphics capabilities with a user-friendly interface..."

"We're very happy to announce the release of Maple 7, Japanese Edition," said Shigehisa Inoue, managing director at Cybernet Systems. "The enhanced Maple 7 provides educators, students, researchers and engineers with not only a powerful computing system and new functions, but an easy-to-use GUI and flexible environment in our language. The release of Maple 7, Japanese Edition, represents a major breakthrough and will significantly increase Maple's presence in the Japanese market."

"The Japanese market is one of our most important and successful markets," states Fred Patterson, Vice President of Sales for Waterloo Maple, "and Cybernet Systems is a recognized leader in providing advanced systems software and services in the fields of scientific/technical computing and engineering for over 30 years. We are very pleased to have Cybernet Systems as a partner to help strengthen our Japanese business."

#### **About Maple 7**

Maple 7 is the latest version of the world's most trusted mathematical problem solving software. Widely adopted by universities, colleges, research institutions and companies, Maple 7 delivers the comprehensive environment and support resources to visualize and explore mathematical concepts, develop application tools and share mathematical information and documents on the Web. Combined with hundreds of free add-on packages and applications available through The Maple Application Center (www.mapleapps.com), Maple 7 constitutes the most powerful and flexible analytical tool for professors, researchers, scientists, engineers and students.

### About Cybernet Systems Co., Ltd.

Cybernet Systems, Co., Ltd., provides advanced systems, software and services in the field of scientific/technical computing and engineering. Its analysis/simulation software and services cover a wide range of the production process enabling companies to benefit from complete digital engineering. Detailed information regarding Cybernet Systems is available at <a href="http://www.cybernet.co.jp">http://www.cybernet.co.jp</a>.

## **About Waterloo Maple**

Founded in 1988, Waterloo Maple is a world leader in mathematical and analytical software. The Maple system embodies advanced technology such as symbolic computation, infinite precision numerics, innovative Web connectivity and a powerful language for solving a wide range of mathematical problems encountered in modeling and simulation. Over a million users have adopted Waterloo Maple products as their preferred platform for exploring and managing complex problems in engineering, science, mathematics and technical education. Virtually every major university and research institute in the world, including MIT, Stanford, Oxford and Waterloo, has adopted Maple to enhance their education and research activities. Waterloo Maple's industrial customer base includes Nortel, Raytheon, Boeing, and DaimlerChrysler. For more information see <a href="https://www.maplesoft.com">www.maplesoft.com</a>.
