

## Waterloo Maple Announces MaplePrimes™

### Exclusive Web site offers free product add-ons to Maple customers

**WATERLOO, CANADA, December 3, 2001**— Waterloo Maple Inc., a world leader in mathematical software for education, research and industry, today announced the [MaplePrimes™ Web site](#), a members-only site that offers exclusive Maple® technology, information and value-added services to subscribers of Waterloo Maple's Extended Maintenance Plan (EMP).

Intended to offer maximum value to dedicated customers, access to MaplePrimes entitles EMP customers to:

- Downloads of exclusive Maple add-on software
- Early access to new technology from Waterloo Maple
- Previews of upcoming product features and components
- Electronic versions of Maple product documentation
- Priority access for comments and suggestions to Waterloo Maple product specialists

EMP customers will be assigned a unique user ID and password to access the MaplePrimes. Once on the Web site, users are entitled to available downloads and all other materials for free. EMP customers will be notified by email about all major additions to the site.

“MaplePrimes is the latest expression of appreciation for the continued support by our EMP customers,” states Tom Lee, Vice President of Marketing for Waterloo Maple. “This site is unique in our industry and it raises the bar for the level of service that software companies should offer their devoted customers.”

MaplePrimes will be available on Tuesday, December 11, 2001, to Maple customers who currently subscribe to EMP. These customers will automatically be sent a password and ID to access the site. For more information about MaplePrimes and how to become an EMP subscriber, visit the MaplePrimes Web site at [www.mapleprimes.com](http://www.mapleprimes.com) or contact Waterloo Maple and ask to speak to your Maple account manager. Outside of North America please contact the Maple reseller partner for your region.

#### About Waterloo Maple

Founded in 1988, Waterloo Maple is a world leader in mathematical and analytical software. The Maple system embodies advanced technology such as symbolic computation, infinite precision numerics, innovative Web connectivity and a powerful 4GL language for solving a wide range of mathematical problems encountered in modeling and simulation. Over a million users have adopted Waterloo Maple products as their preferred platform for exploring and managing complex problems in engineering, science, mathematics and technical education. Virtually every major university and research institute in the world, including MIT, Stanford, Oxford and Waterloo, has adopted Maple to enhance their education and research activities. Waterloo Maple's industrial customer base includes Nortel, Raytheon, Boeing, and DaimlerChrysler. For more information see [www.maplesoft.com](http://www.maplesoft.com).
