## Maple 7 begins shipping 15 days ahead of schedule

# Maple 7 begins shipping 15 days ahead of schedule Waterloo Maple provides customers with the latest version of the world's leading math software starting today

WATERLOO, CANADA, June 14, 2001—Waterloo Maple, a world leader in mathematical software for education, research and industry, is pleased to announce that it will begin shipping the newest version of the widely adopted Maple mathematical computation product, Maple® 7, today—a full two weeks ahead of schedule. Maple 7 is now available for all supported platforms, including Windows, Macintosh, Linux and UNIX.

Maple 7 was announced on June 1st of this year and received widespread interest from customers and the mathematics community. Waterloo Maple responded by increasing its efforts to deliver the product without delay. All the new features and innovative technical enhancements that were promised, have been integrated, including:

- Sweeping range of new differential equation (DE) solvers
- Complete units and dimensions management
- Enhanced Web connectivity
- Powerful resources available for free through The Maple Application Center at www.mapleapps.com

"The early release is further proof of Waterloo Maple's company-wide commitment to overachieving customer expectations and to the constant pursuit of adding value," states Fred Patterson, Vice President, Sales. "We are excited that customers will take advantage of Maple 7's power and functionality sooner and, through The Maple Application Center, will be able to achieve a higher level of productivity than ever before."

A special limited time upgrade offer is currently available. Users should contact their Waterloo Maple account representative or authorized international reseller for more information.

#### **About Maple 7**

Maple 7 is the latest version of the world's most trusted mathematical problem solving software. Widely adopted by universities, colleges, research institutions and companies, Maple 7 delivers the comprehensive environment and support resources to visualize and explore mathematical concepts, develop application tools and share mathematical information and documents on the Web. Combined with hundreds of free add-on packages and applications available through The Maple Application Center (www.mapleapps.com), Maple 7 constitutes the most powerful and flexible analytical tool for professors, researchers, scientists, engineers and students.

### **About Waterloo Maple**

Founded in 1988, Waterloo Maple is a world leader in mathematical and analytical software. The Maple system embodies advanced technology such as symbolic computation, infinite precision numerics, innovative Web connectivity and a powerful 4GL language for solving a wide range of mathematical problems encountered in modeling and simulation. Over a million users have adopted Waterloo Maple products as their preferred platform for exploring and managing complex problems in engineering, science, mathematics and technical education. Virtually every major university and research institute in the world, including MIT, Stanford, Oxford and Waterloo, has adopted Maple to enhance their education and research activities. Waterloo Maple's industrial customer base includes Nortel, Raytheon, Boeing, and DaimlerChrysler. For more information see <a href="https://www.maplesoft.com">www.maplesoft.com</a>.
