

### **Waterloo Maple Engages Bowne Internet Solutions To Build Next Generation Web Resource for Technical Professionals.**

**TORONTO, CANADA, May 11, 2000** - Waterloo Maple Inc., the leading provider of advanced software solutions for analytical and mathematical computation, selected Bowne Internet Solutions, a leading Web consultant and developer, to build a next generation Web resource for technical professionals in science, engineering and mathematics.

"Bowne Internet is known for their ability to design smart, strategic Web sites that also convey a superior user experience," said Ian Suttie, CEO and president of Waterloo Maple. "After our initial conversations with Bowne Internet, it became clear that their interactive architects and business strategists shared our vision of the positive impact this new initiative will have on technical professionals' ability to solve complex problems."

"This project highlights Bowne Internet's advanced strategic and technical capabilities, enabling our staff to unify those areas of excellence in a way that will fulfill Waterloo Maple's vision," said Carl Glaeser, CEO of Bowne Internet Solutions and senior vice president of Bowne & Co. "We look forward to successfully completing this Web site so that Waterloo Maple will fill a unique and increasingly important niche in the technical community."

About Bowne Internet Solutions Bowne Internet Solutions ([www.bowneinternet.com](http://www.bowneinternet.com)) is a uniquely qualified Web consultant and developer that balances business strategy, project management, usability and technical expertise without compromising speed, accuracy, security or confidentiality. Bowne Internet can engage a client at any stage of their Internet initiative. The company quickly defines, delivers and evolves stable, scalable, highly technical websites by unifying a pragmatic approach with strategic consulting and superior project management around a client's business goals. The majority of Bowne Internet's work is rooted in financial services client base where the demand for technically complex, security-conscious consulting and development expertise is critical. The company also does a significant amount of work with emerging e-business companies, where confidentiality, speed and technical information are equally important. Part of Bowne & Co. (NYSE: BNE), the world's largest financial printer and a leader in document and information management, Bowne can manage, repurpose and distribute a client's information to any audience, through any medium, in any language, anywhere in the world.

About Waterloo Maple Inc. Founded in 1988, Waterloo Maple ([www.maplesoft.com](http://www.maplesoft.com)) is a world leader in mathematical and analytical software. The Maple system embodies advanced technology such as symbolic computation, infinite precision numerics, and a powerful 4GL language for solving a wide range of mathematical problems encountered in modeling and simulation, and in technical education. Over a million users have adopted Waterloo Maple products as their preferred platform for exploring and managing complex problems in engineering, science, mathematics, and education. Waterloo Maple's customers base includes most major universities and research organizations in the world, leading enterprises such as Nortel, Raytheon, Boeing, and DaimlerChrysler.
