

# Maple Calculator Premium Now Included in Maple

Maple Calculator Premium is now included with Maple as a benefit of the Elite Maintenance Program (EMP).

The Maple Calculator app brings the power of Maple's math engine to your mobile device. With more than 6 million downloads and a 4.5-star rating, it is one of the most widely used advanced mathematics apps available today. Now, Maple users who have an EMP membership get Premium-level access to Maple Calculator, providing unlimited step-by-step solutions and AI-powered word problem support, in addition to the extensive solvers and visualization tools available in the base application.

## About Maple Calculator

Designed for students, educators, and professionals, Maple Calculator combines Maple's computational strength with an intuitive mobile interface. Whether you are solving equations, evaluating integrals, factoring polynomials, working with matrices, or visualizing functions, Maple Calculator performs the mathematics using the same engine that powers Maple.

## Capture and Solve Mathematics Instantly

Maple Calculator allows you to enter mathematics in multiple ways:

- Type expressions using standard mathematical notation
- Take a photo of handwritten or typeset mathematics
- Capture a fully worked handwritten solution using your phone's camera

Using AI-power, Maple Calculator can recognize handwritten or typeset mathematics from a photo. Whether you capture a single expression or an entire worked solution, the app can solve the problem, generate step-by-step solutions, create 2-D and 3-D visualizations, or use Check My Work to verify each step.

## From Your Phone to Maple

Maple Calculator is tightly connected to Maple through Maple Cloud, making it another easy way to bring mathematics into Maple.

You can take a photo of an expression in Maple Calculator and upload the recognized mathematics directly into a Maple worksheet. This allows you to move seamlessly from work done on paper or in class to deeper computation, refinement, and visualization in Maple

## AI-Assisted Word Problems

Maple Calculator also uses AI to interpret and structure word problems. By capturing a word problem with your camera, the app uses a large language model (LLM) to identify the underlying mathematics and generate a structured solution. The resulting mathematics is then computed using Maple's engine.

## International Language Support

Maple Calculator is available in:

- English
- Spanish
- French
- German
- Russian
- Danish
- Swedish
- Japanese
- Simplified Chinese

## Maple Calculator Premium and EMP

Maple Calculator Premium is included as a benefit of the [Elite Maintenance Program \(EMP\)](#).
